

## TAKE THE MONOTONY OUT OF DRILLING

Mastercam ProDrill is a highly-customizable feature based drilling Add-On for Mastercam. From automatic to fully-customizable drilling routines on surface or solid models from virtually any CAD source, users can take time consuming, repetitive drilling tasks and adapt them to their style of machining.

### Complex or High Volume Drilling Routines Made Easy

Whether you're machining 2D blocks or complex 5-axis parts, ProDrill guides you through identifying the drill forms, applying the drilling strategies and managing them in an intuitive and user-controlled manner.

### Graphical Drill Form Creation

Quickly and easily create a strategy for complex holes, then with one click, create all associated features. ProDrill will generate cutting strategies on an unlimited number of operations.

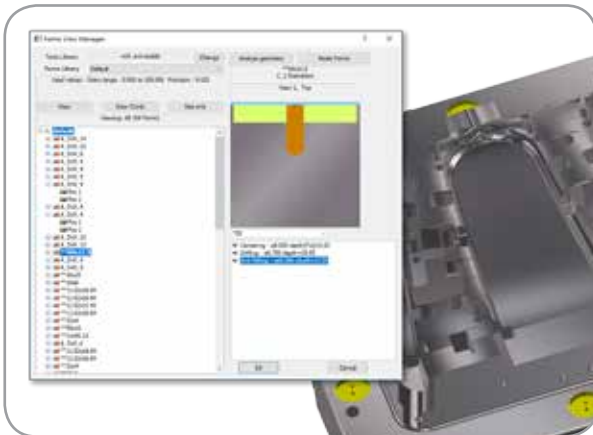

### Additional Features and Benefits:

- Drilling features include simple drilling, counter-boring, reaming and boring, chamfering and counter-sinking, threading and tapping, circle milling, and custom drill forms.
- Optimized tool plane rotation minimizes unnecessary movements.
- Toolpath grouping for optimal usage.
- Ability to generate toolpaths for all operations on your part, or on a selective basis.
- Effective collision checking and verification.

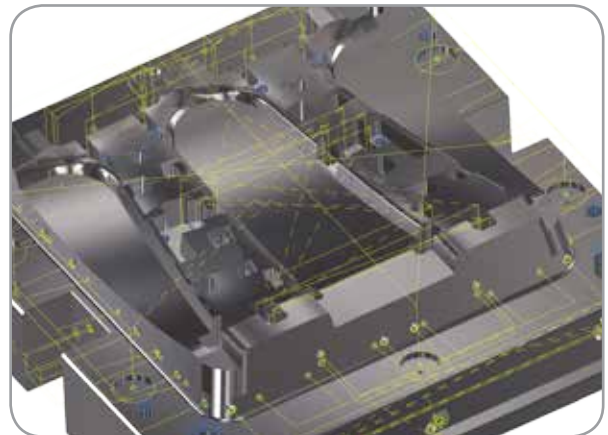

Mastercam ProDrill comes with unparalleled support from the World's #1 CAD/CAM software.

# THE PRODRILL PROCESS

Customize your hole making process or use automatic detection.

Let Prodrill scan the part and create all the necessary planes, tools, and toolpaths for your machining needs.

**Note:** Mastercam ProDrill is a Mastercam product that must be purchased separately. It runs on Mastercam Mill and Mastercam Router. Mastercam Multiaxis is not required for Mastercam ProDrill.
